The literature research workflow

The Web of Science Group supports the entire research workflow

Web of Science

The world's largest and highest quality publisher-neutral citation index.

Essential Science Indicators

Reveals emerging science trends as well as influential individuals, institutions, papers, journals, and countries across 22 categories of research.

Journal Citation Reports

The world's most influential and trusted resource for evaluating peer-reviewed publications.

InCites Benchmarking & Analytics

Analyze institutional productivity and benchmark your output against peers worldwide.

ScholarOne

Simplified submission workflows and peer review for scholarly publishers and societies.

EndNote

A smarter way to streamline references and write collaboratively.

Kopernio

Fast, one-click access to millions of high-quality research papers.

Publons

Supporting researchers through documenting their peer-review and journal editing contributions, providing guidance and best practice for the peer-review process, as well as increasing the overall visibility of their research and its impact.

Converis

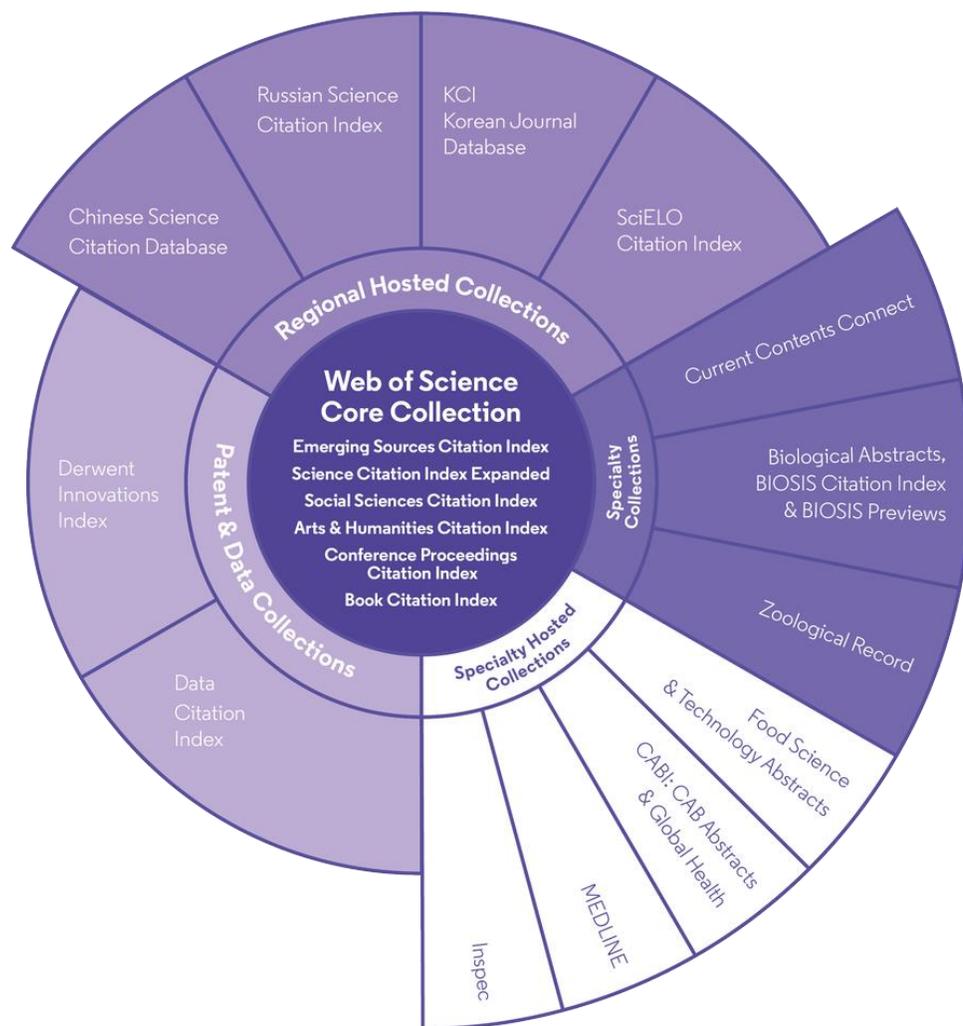

One flow to let institutions collect, manage, and report on all research activity, working seamlessly with an institutions existing systems.

Web of Science Author Connect

Reach leading researchers in the sciences, social sciences, and arts and humanities.

Web of Science Platform

Multidisciplinary research experience across the sciences, social sciences, and arts and humanities

34,000+

Journals across the platform

87 million

Patents for over 43 million inventions

21,000+

Total journals in the *Core Collection*

8.9 million+

Data Sets and Data Studies

1.8 billion+

Cited references

Backfiles to 1900

With cover-to-cover indexing

166 million+

Records

218,000+

Conference proceedings

12.6 million

Records with funding data

111,000+

Books

Journal Impact Factor**

[Master Journal List](#)

Master Journal List <https://mjl.clarivate.com/>

Browse, search, and explore journals indexed in the Web of Science

IMPROVED SEARCH FUNCTIONALITY

Search across 24,000+ journals across 254 subject disciplines.

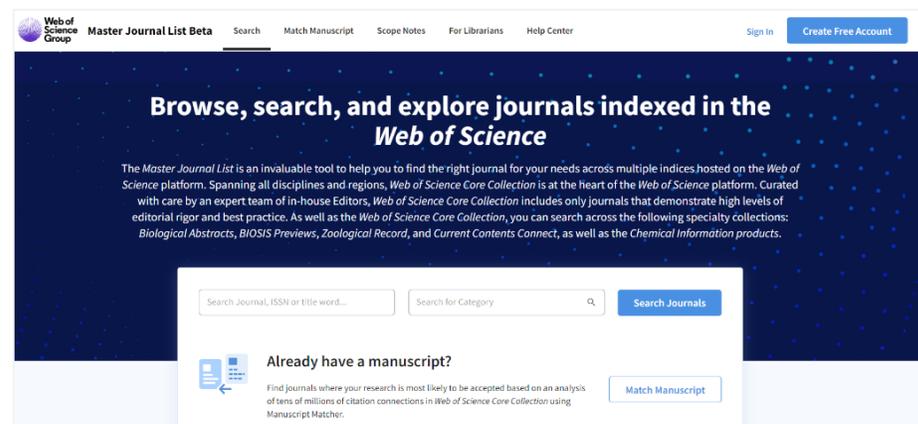

MANUSCRIPT MATCHER

Find the best fit for your manuscript powered by Web of Science data.

JOURNAL PROFILES

Access key information about and metrics for a comprehensive journal overview.

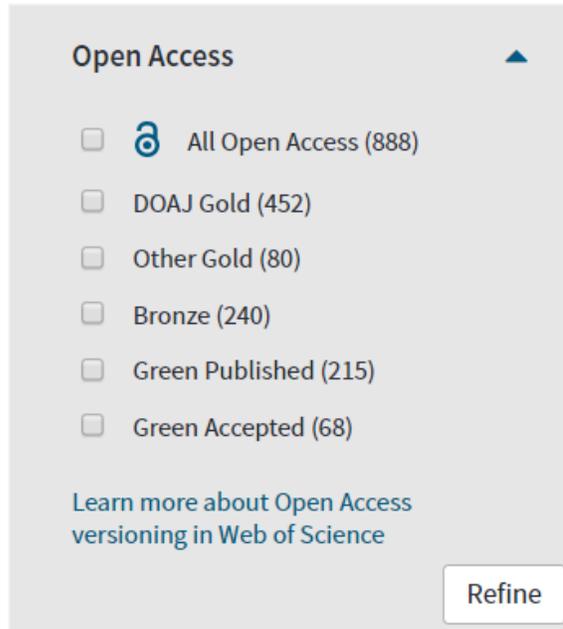

How do you avoid predatory Open Access?

Web of Science is the trusted whitelist for Open Access, comprising curated journal collections that carefully aim to exclude predatory journals. Users can therefore search and access millions of trusted peer-reviewed OA articles with confidence across the Web of Science, while also identifying OA journals to publish in. <https://unpaywall.org/sources>

Access to Full text: Open Access

Helping the research community discover, evaluate and access high-quality Open Access content

Open Access

- All Open Access (888)
- DOAJ Gold (452)
- Other Gold (80)
- Bronze (240)
- Green Published (215)
- Green Accepted (68)

[Learn more about Open Access versioning in Web of Science](#)

Refine

- **DISCOVER AND ACCESS TRUSTED PEER-REVIEWED OA WITH CONFIDENCE**
- **LIMIT YOUR FULL TEXT SPENDING WITH SEAMLESS ACCESS TO MILLIONS OF OA ARTICLES**
- **ACCESS LEGAL VERSIONS OF THE FULL TEXT STORED AND SHARED IN REPOSITORIES (GREEN OA)**

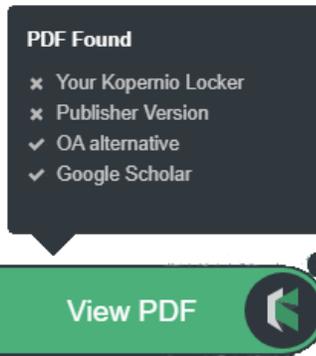

To support any types of analysis, Web of Science has introduced the different OA versions of articles, as per [Unpaywall](#) application: [DOAJ Gold](#), [Other Gold \[e.g. Hybrid\]](#), [Bronze](#), [Green \(Accepted & Published\)](#). All identified OA versions for an article are stored rather than just one. We will still preference the link to the “best” version: version of Record at the publisher website when available.

Access to Full text: Kopernio

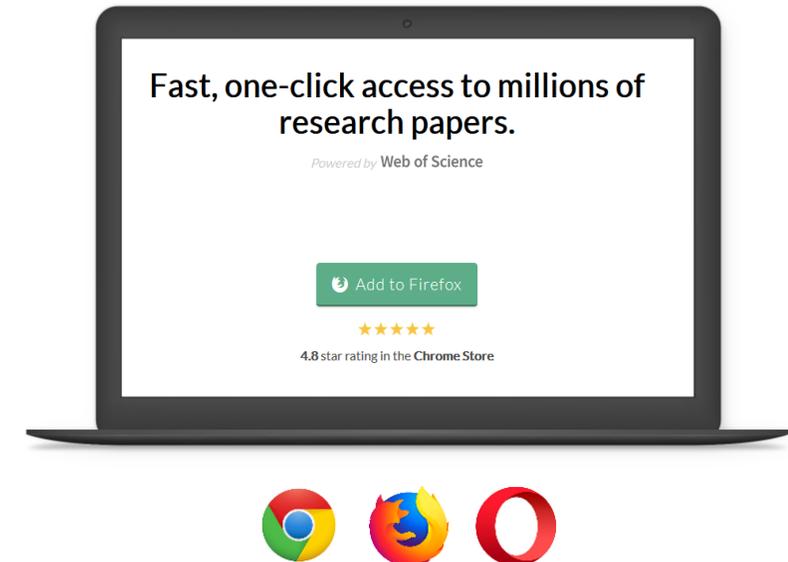

A browser plugin that finds the best available PDF of an academic article while you browse.

Behind the scenes Kopernio will search (where possible) your institution's subscriptions and open databases to find the best version of the paper for you.

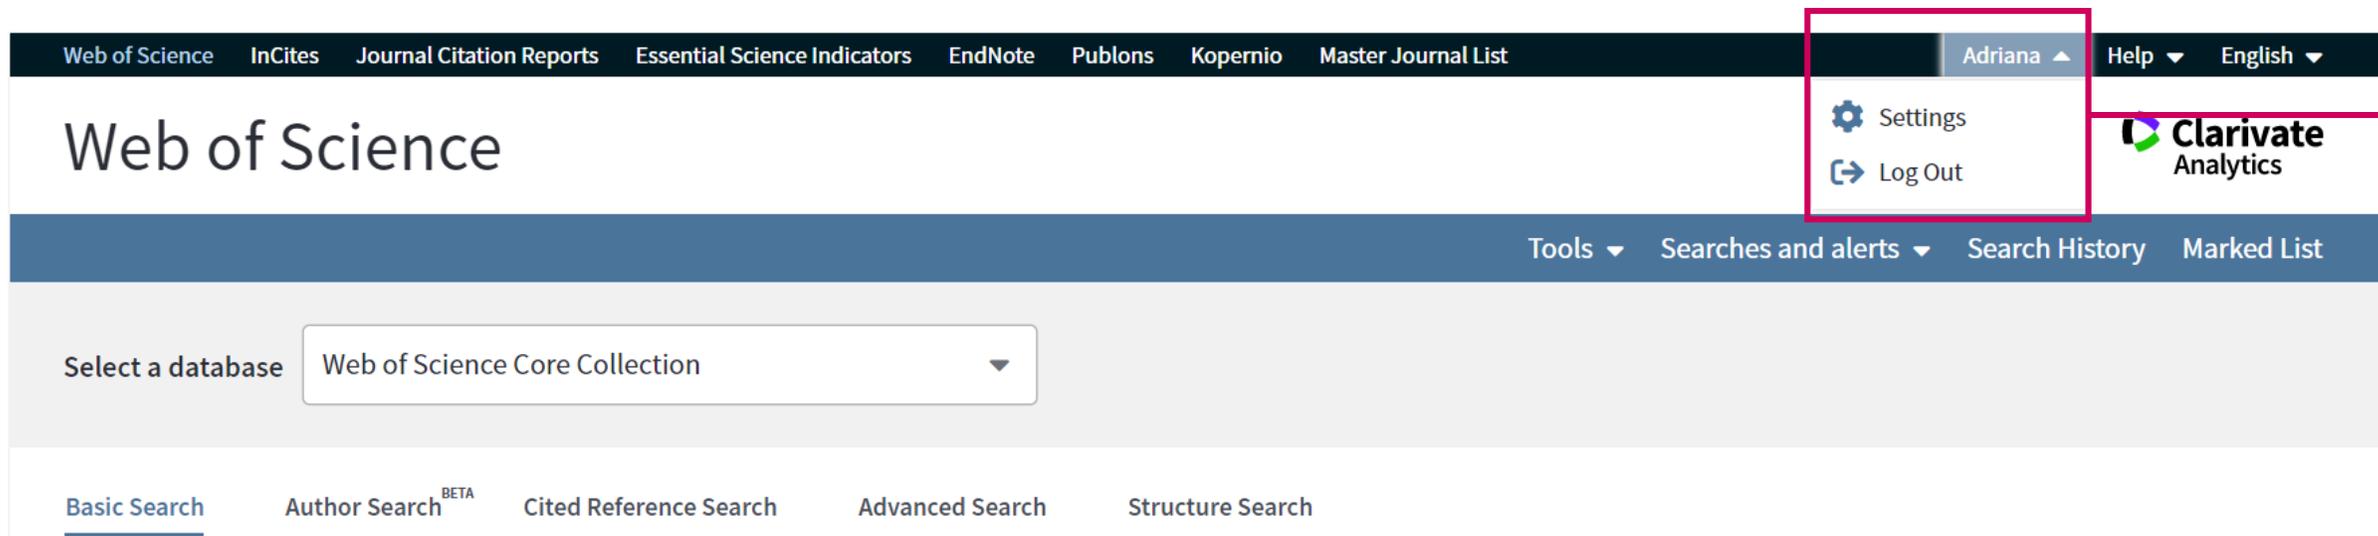

When Kopernio is able to find at least one version of the PDF, it displays the green indicator. This can be clicked to view the PDF in the Locker. Hovering over the indicator shows where Kopernio found PDFs.

When Kopernio is not able to find at least one version of the PDF, it displays this new indicator. When this is clicked, the site's preferred solution is actioned. Hovering over the indicator shows the site's preferred message.

Create your own Web of Science Account

The screenshot shows the top navigation bar of the Web of Science website. The user's name, 'Adriana', is displayed in the top right corner, with a dropdown menu containing 'Settings' and 'Log Out' options. The 'Settings' option is highlighted with a red box. Below the navigation bar, the 'Web of Science' logo is visible on the left, and the 'Clarivate Analytics' logo is on the right. The main content area features a search bar with the text 'Web of Science Core Collection' and a dropdown arrow. Below the search bar, there are several search options: 'Basic Search', 'Author Search^{BETA}', 'Cited Reference Search', 'Advanced Search', and 'Structure Search'. The 'Basic Search' option is currently selected.

With your Web of Science account, you can:

- Automatically sign in every time you access Web of Science.
- Select a starting application, which will enable you to start your session in a specific database rather than on the Web of Science Core Collection page.
- Update your personal information including username and password.
- **Save searches** to the Web of Science server that can be opened later at any time.
- **Set up search history alerts.** The alert automatically searches the latest update to the database, and then sends the results by e-mail.
- **Set up citation alerts,** which notifies the user by e-mail whenever an article in the Citation Alerts list has been cited by a new article. Create and maintain custom journal lists and set up Table of Contents e-mail alerts.
- Add references to an **EndNote library** directly from Web of Science Core Collection and other Web of Science databases.

+ **Anywhere/Anytime Access:** you can access Web of Science from anywhere at any time using your Web of Science username and password.

Select a database

The screenshot shows the Web of Science interface. At the top right is the Clarivate Analytics logo. Below it is a navigation bar with 'Tools', 'Searches and alerts', 'Search History', and 'Marked List'. On the left, there is a 'Select a database' dropdown menu currently set to 'Web of Science Core Collection'. A list of other databases is visible below it, including 'All Databases', 'Biological Abstracts', 'BIOSIS Citation Index', 'BIOSIS Previews', 'CABI: CAB Abstracts® and Global Health®', 'Chinese Science Citation Database SM', 'Current Contents Connect', and 'Data Citation Index'. To the right of the dropdown is a search box with the text 'Example: oil spill' and a 'Search' button. Below the search box is a 'Timespan' section set to 'All years (1900 - 2013)'. A red box highlights the dropdown menu, and a red arrow points from a text box at the bottom to the 'Web of Science Core Collection' option in the dropdown. To the right of the dropdown, there is a detailed description of the 'Web of Science Core Collection (1900-present)' with a list of features.

Current Contents Connect

Data Citation Index

Web of Science Core Collection (1900-present)

Search the world's leading scholarly journals, books, and proceedings in the sciences, social sciences, and arts and humanities and navigate the full citation network.

- All cited references for all publications are fully indexed and searchable.
- Search across all authors and all author affiliations.
- Track citation activity with Citation Alerts.
- See citation activity and trends graphically with Citation Report.
- Use Analyze Results to identify trends and publication patterns.

Example: oil spill

Search

Search tips

Timespan

All years (1900 - 2013)

More settings ▾

Select a database (among databases contracted by your institution).

Search rules

SEARCH OPERATORS

- Use **AND** to find records containing all of your search terms
- Use **OR** to find records containing any of your search terms
- Use **NOT** to exclude records containing certain words from your search
- Use **NEAR/n** to find records containing all terms within a certain number of words (n) of each other (stress NEAR/3 sleep)
- Use **SAME** in an Address search to find terms in the same line of the address (Tulane SAME Chem)

WILD CARD CHARACTERS

Use truncation for more control of the retrieval of plurals and variant spelling

- * = zero to many characters
- ? = one character
- \$ = zero or one character

PHRASE SEARCHING

To search exact phrases in Topic or Title searches, enclose a phrase in quotation marks. For example, the query “energy conservation” finds records containing the exact phrase energy conservation.

AUTHOR NAME

- Enter the last name first, followed by a space and up to five initials.
- Use truncation and search alternative spelling to find name variants:
- Driscoll C finds Driscoll C, Driscoll CM, Driscoll Charles, and so on.
- Driscoll finds all authors with the last name Driscoll
- De la Cruz f* OR Delacruz f* finds Delacruz FM, De La Cruz FM, and so on.

Web of Science Core Collection | Basic Search

Search Fields

- Topic
- Title
- Author
- Author Identifiers
- All Fields
- Group Author
- Editor
- Publication Name
- DOI
- Year Published
- Address
- Organizations-Enhanced
- Conference
- Language
- Document Type
- Funding Agency
- Grant Number
- Accession Number
- PubMed ID

Fields mined to return results in a common **Topic Search**:

1. The **Title** of the article, review, proceeding, book, etc.
2. The **Abstract**, which is the work's summary containing the key points discussed such as research question, methodology, discussion and conclusion. This field is supplied by the author(s) of the article or paper.
3. The **Keywords** and **Keywords Plus** fields: The keywords field is the one supplied by the author(s) and "tags" the main and sub topics of the paper's content. The keywords plus field is an algorithm that provides expanded terms stemming from the record's cited references or bibliography.

Web of Science Core Collection | Organization Search

The screenshot shows the Web of Science interface. At the top left is the 'Web of Science' logo. At the top right is the 'Clarivate Analytics' logo. Below the logo is a navigation bar with 'Tools', 'Searches and alerts', 'Search History', and 'Marked List'. The main search area has a 'Select a database' dropdown menu with 'Web of Science Core Collection' selected, highlighted with a red box and a blue circle with the number '1'. To the right of this is a notification bell icon and the text 'Access free resources to support coronavirus research.'. Below the database selection is a search bar with 'Example: Johns Hopkins University' and a search button. The search bar has a dropdown menu with 'Organization-Enhanced' selected, highlighted with a red box and a blue circle with the number '2'. Below the search bar is a search aid dropdown menu with 'Select available organizations from the Index' selected, highlighted with a red box and a blue circle with the number '3'. Below the search aid dropdown menu is a red box with white text: 'Organizations - Enhanced List. Select the search aid to go to the Organization-Enhanced List where you can view and select preferred organization names and/or their variants.' To the right of the search bar is a red box with white text: 'Searching the Organizations - Enhanced Field. Search for preferred organization names and/or their name variants from the Preferred Organization Index. 14,000+ UNIFIED ORGANIZATIONS'.

Organizations - Enhanced List

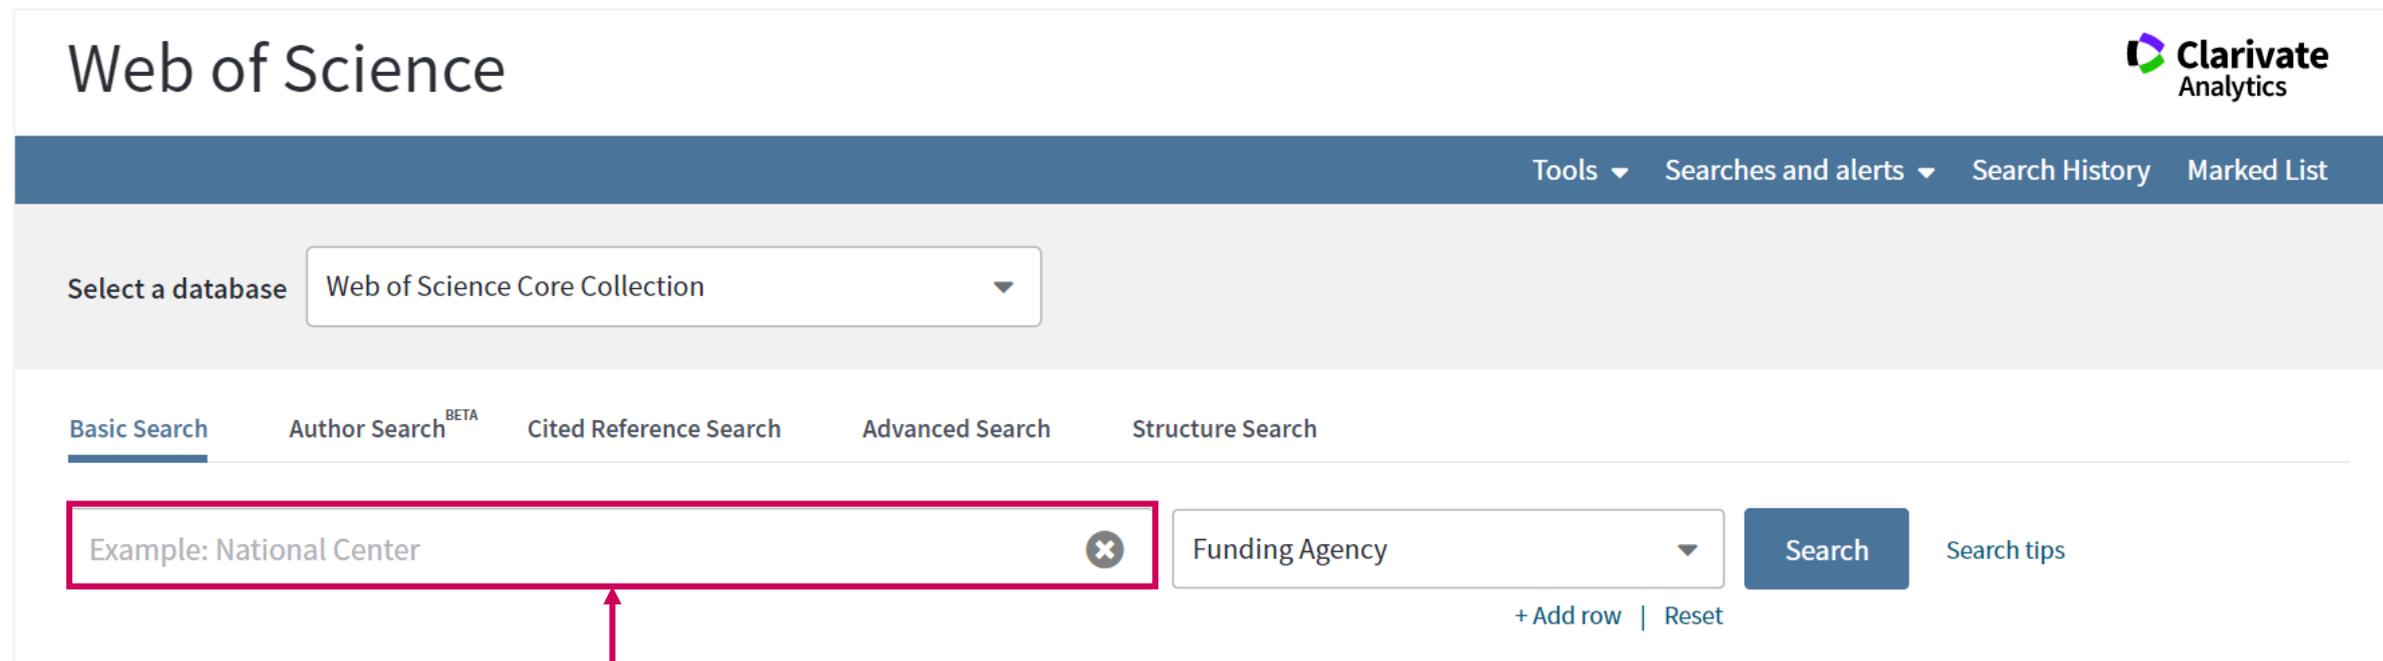

Select the search aid to go to the Organization-Enhanced List where you can view and select preferred organization names and/or their variants.

Searching the Organizations - Enhanced Field

Search for preferred organization names and/or their name variants from the Preferred Organization Index.

Advanced Search enables you to form and combine search sets.

Field tags enable you to search data fields within a record.

Web of Science Core Collection | Cited Reference Search

Basic Search Author Search ^{BETA} **Cited Reference Search** Advanced Search Structure Search

Find the articles that cite a person's work.

Step 1: Enter information about the cited work. Fields are combined with the Boolean AND operator.

Example: O'Brian C* OR OBrian C* Cited Author

Select from Index

Example: J Comp* Appl* Math* Cited Work

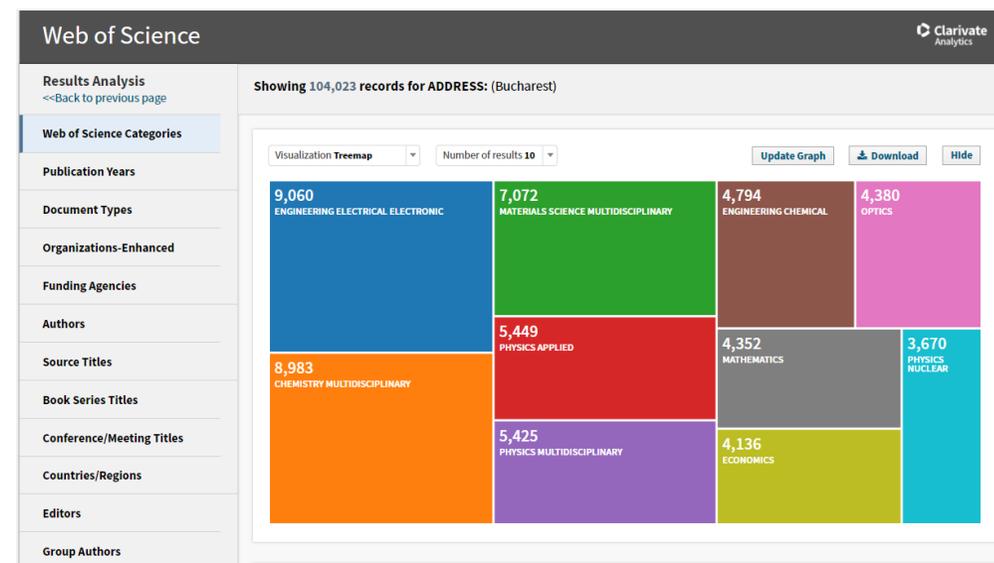

Select from Index
View abbreviation list

Example: 1943 or 1943-1945 Cited Year(s)

Search

+ Add row | Reset

Search for records that have cited a published work.
Check out if you are missing any citations.

Analyze the citing articles

All Database search

A topic search at the **All Databases** level helps discover content in formats and document types across all content sets.

The screenshot displays the search interface for 'All Databases'. At the top, a dropdown menu is set to 'All Databases'. Below this, there are three search tabs: 'Basic Search' (selected), 'Cited Reference Search', and 'Advanced Search'. A search input field contains the query: '(((covid OR coronavirus OR sars) AND chloroquine)'. Below the search bar is a 'Timespan' dropdown set to 'All years (1864 - 2020)'. To the right of the search bar, there are two filter panels. The 'Databases' panel shows a list of databases with checkboxes and record counts: MEDLINE® (67), Web of Science Core Collection (57), BIOSIS Citation Index (45), BIOSIS Previews (45), Biological Abstracts (39), Current Contents Connect (38), CABI (26), and SciELO Citation Index (1). The 'Document Types' panel shows a list of document types with checkboxes and record counts: ARTICLE (110), OTHER (40), REVIEW (24), EDITORIAL (19), LETTER (10), ABSTRACT (6), EARLY ACCESS (5), BOOK (3), MEETING (3), NEWS (3), and UNSPECIFIED (1). A 'Search' button is located between the two filter panels. The word 'Topic' is written next to the search bar, and red arrows point from the 'Databases' and 'Document Types' filter panels to the search bar.

A topic search at the All Databases level takes advantage of the specialized indexing systems of each specific resource (MeSH Terms in Medline, Taxonomic Data in BIOSIS, Class and Manual codes in Derwent etc.).

The Clarivate Analytics staff have mapped the specialized vocabularies from each of the different classification systems onto a common indexing backbone called **Research Areas**, which are broadly based on Web of Science Core Collection / Journal Citation Report classifications.

After a topic search at the All Databases level, you can refine by Research Areas and focus on content you are interested in without having to know the specialized vocabularies of each indexing system. For example, a topic search for "heart attack" pulls up more than 16,000 records, and if I refine by "Pathology" under Research Areas, I can go to those documents without having to know the specific MeSH terms those documents were indexed by.

All Database search

In cases where there is overlap between databases on the Web of Science platform—if the same article is indexed in Web of Science Core Collection, Medline, and BIOSIS Citation Index--a search at the All Databases level provides additional value with access to the article's metadata from each of those databases on the platform.

E.g. Medline MeSH Terms and Chemical Terms

MeSH Terms:	
Heading	Qualifier
*Betacoronavirus	
Coronavirus Infections	*diagnosis
	*therapy
Emergencies	
*Health Communication	
Humans	
*Information Dissemination	
Pandemics	
Pneumonia, Viral	*diagnosis
	*therapy
Public Health	

Chemical:	
Registry Number	Substance
0	COVID-19
txid2697049	severe acute respiratory syndrome coronavirus 2

Full Record

The screenshot shows a full record page for a research article. Key features include:

- Export... button:** Located at the top right, highlighted with a red box and an arrow pointing to a blue callout box.
- Article Title:** "Remdesivir and chloroquine effectively inhibit the recently emerged novel coronavirus (2019-nCoV) in vitro".
- Authors:** Wang, ML, Cao, RY, Zhang, LK, Yang, XL, Liu, J, Xu, MY, Shi, ZL, Hu, ZH, Zhong, W, Xiao, GF.
- Journal Information:** CELL RESEARCH, Volume: 30, Issue: 3, Pages: 269-271, DOI: 10.1038/s41422-020-0282-0, Published: MAR 2020.
- Keywords:** VIRUS-INFECTION; EBOLA-VIRUS.
- Author Information:** Reprint addresses for Hu, ZH; Xiao, GF and Zhong, W.
- Addresses:** [1] Chinese Acad Sci, Wuhan Inst Virol, Ctr Biosafety Mega Sci, State Key Lab Virol, Wuhan 430071, Peoples R China. [2] Beijing Inst Pharmacol & Toxicol, Natl Engr Res Ctr Emergency Drug, Beijing 100850, Peoples R China.
- Funding:** A table listing funding agencies and grant numbers.
- Citation Network:** A sidebar on the right showing 10 Times Cited and 11 Cited References.
- Most recently cited by:** A list of articles that have cited the current one.
- Use in Web of Science:** A sidebar on the right showing a Web of Science Usage Count of 102 (Last 180 Days) and 102 (Since 2013).
- View PDF button:** Located at the bottom left, highlighted with a red box and an arrow pointing to a blue callout box.

Navigate the citation network to find more relevant results

The **Cited References** count displays the number of documents cited by the current record. Click the link to view the list of cited references. From there you can view the full record of each cited reference. (Access to the full records of cited references may be limited to your institution's subscription.)

The **Times Cited** count is the number of articles in the database that cite the current article. Click the number to go to the list of citing articles.

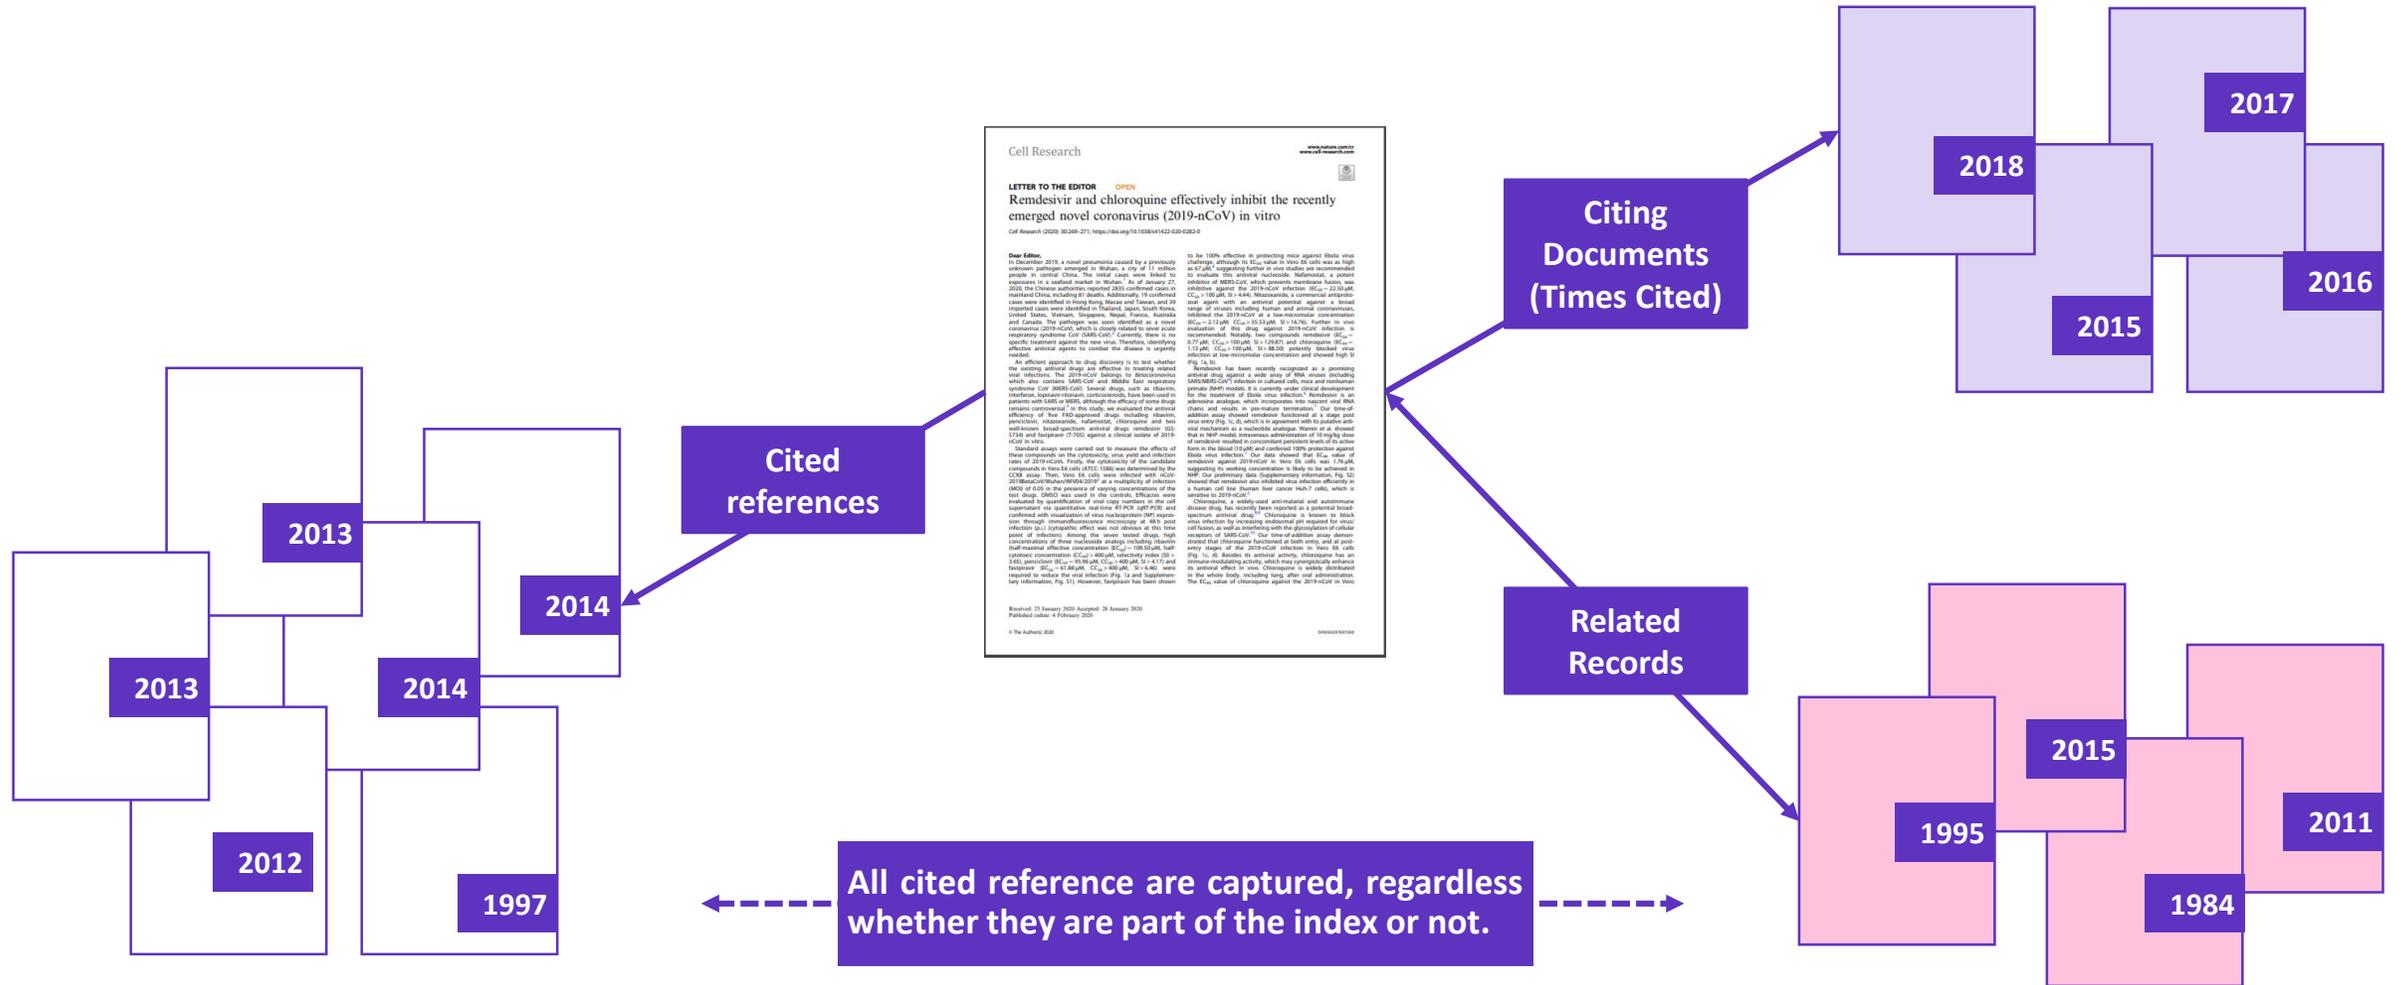

The Usage Count is a measure of the level of interest in a specific item on the Web of Science platform.

The count reflects the number of times the article has met a user's information needs as demonstrated by clicking links to the full-length article at the publisher's website (via direct link or Open-Url) or by saving the article for use in a bibliographic management tool (via direct export or in a format to be imported later).

Access and store the full-text PDF with the free **Kopernio** browser plugin.
